

C1
concl'd

a transmitting device for transmitting the image information and the print information to an external apparatus.

2. (Twice Amended) The camera of claim 1, wherein the print information producing device produces the print information further including print quantity information, which expresses a quantity of prints, and the transmitting device transmits the image information and the print information including the print designating information and the print quantity information.

- C2
3. (Amended) The camera of claim 1, further comprising:

an inputting device for inputting information necessary for producing the print information, wherein the print information producing device produces the print information on the basis of the information inputted by the inputting device.

4. (Amended) The camera of claim 1, further comprising:

a power source for supplying electricity to at least one of the image-pickup device, the print information producing device and the transmitting device; and

a detecting device for detecting the condition of the power source and for obtaining the power source information, wherein the transmitting device transmits information based on the power source information.

5. (Amended) The camera of claim 1, further comprising:

a power source for supplying electricity to at least one of the image-pickup device, the print information producing device and the transmitting device;

a detecting device for detecting the condition of the power source and for obtaining the power source information; and
a display device for indicating the power source information.

6. (Amended) The camera of claim 1, further comprising:

a receiving device for receiving image forming apparatus information representing the condition of an image forming apparatus to which the transmitting device transmits the image information and the print information.

7. (Amended) The camera of claim 6, further comprising:

a display device for indicating the image forming apparatus information.

8. (Amended) The camera of claim 6, further comprising:

a device for indicating warning on the basis of the image forming apparatus information.

9. (Amended) The camera of claim 6, further comprising:

a device for indicating a communicating situation between the camera and the image forming apparatus.

10. (Amended) The camera of claim 1, further comprising:

a receiving device for receiving information regarding the image forming capability of an image forming apparatus to which the transmitting device transmits the image information and the print information.

11. (Amended) The camera of claim 10, further comprising:

a device for indicating the information regarding the image forming capability of an image forming apparatus.

C2
Concl'd

12. (Amended) The camera of claim 1, wherein the transmitting device is a device for conducting wireless communication.

C3

13. (Twice Amended) The camera of claim 1, further comprising:
a receiving device for receiving image information from another camera,
wherein the transmitting device transmits the image information
received from the another camera and the print information.

C4

17. (Amended) The camera of claim 1, further comprising:
a receiving device for receiving receipt information produced by an image
forming apparatus to which the transmitting device transmits the
image information and the print information; and
a display device for indicating the receipt information.

C5

18. (Twice Amended) The camera of claim 17, wherein the receipt information
includes a waiting time for the completion of printing and a receipt condition
whether or not information transmitted from the transmitting device is received
normally.

C6

19. (Amended) The camera of claim 1, wherein the transmitting device transmits the
ID of the camera and the ID of the transmitter with the correlation with the image
information.
20. (Amended) The camera of claim 19, further comprising:
a receiving device for receiving information indicating the completion of
printing from the image forming apparatus to which the transmitting
device transmits the image information and the print information.
